ENCLOSED in this issue you will find information about our growing number of replacements for Siemens applications.

Sprechen Sie Deutsch, mein Herr?

Translation: Do you understand German? The good news is that you don't have to understand German to have access to one of the largest supplies of replacement tubes for Siemens Diagnostic X-ray, fluoroscopy, mammographic and CT Tubes on this side of the Atlantic Ocean.

Siemens CT Tubes

Imaging Affiliates has the Siemens Akron B and Q CT Tubes that are used on the Siemens Volume Zoom and the Sensation 16 respectively.

You can enjoy the comfort and peace of mind that you get with a tube that features the full manufacturer's warranty and an attractive price to boot. I know what you're thinking.

You're thinking

that if Imaging Affiliates has the Akron B & Q tubes for the Siemens applications, then we also have replacements for the Philips 8000 and the IDT. You would be correct and we are more than happy to extend these tubes to you long-suffering Philips tube users. Now you don't need to sign a long-term contract to enjoy price protection and savings on your CT Tubes. Call Imaging Affiliates today at (800) 388-9800 and let us tell you how we can save you real money today on all your "German-Tube" purchases.

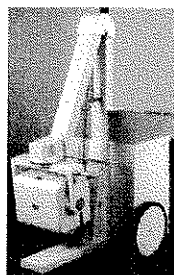

Siemens Image Intensifiers

Imaging Affiliates continues to provide direct replacement image intensifiers for all of your Siemens applications. We have the OEM versions of the 23,27,33 and 40 cm diameter II's that can be ordered in a turn-key configuration or you can send in your defective II for a quick turn-around reload. You get high Siemens quality and performance without having to

pay the high currency conversion to import these tubes.

Siemens Diagnostic X-ray Tubes

Imaging Affiliates has one of the most comprehensive supplies of new Siemens Diagnostic X-ray Tubes this side of Erlangen. Whether it's the standard Opti 150 types or the specialized Polyphos tubes, we have your replacements.

People taking care of the Mobelett systems shouldn't despair either. We've got you covered there as well. Imaging Affiliates has a mixture of direct replacement tubes for these

applications and some OEM versions, too.
